

Get a glimpse
into our:

Inspiration Center

Where inspiration begins and
gummy creation never ends.

Our Inspiration Center

is an entire wing dedicated to *inspiring and catalyzing* creativity in all things gummy!

At our Inspiration Center, groundbreaking research meets creativity to deliver standout products. **From brainstorming, formulation, and branding to packaging, we transform ideas into solutions that meet market needs.**

With a streamlined scale-up process, concepts move quickly from pilot to full production at our Colombia headquarters or our U.S. gummy facility. Blending Art & Science to turn inspiration into reality, faster.

Building a team of unique *certified gummy experts* with our

SENSORY WORLD

At Funtrition® we are committed to designing exceptional sensorial experiences. Our Sensory Panel is a group of **20+ Funtritioners trained to distinguish and evaluate the aroma, taste, and texture** of our gummies in order to support us with:

- **Concept ideation of a new product to be launched.**
- **Alter an existing product, according to client preference or need.**
- **Evaluate a product that has already been released to the market.**
- **Set specific quality standards for our products.**

What happens at our Inspiration Center?

Concept & formulation design at our R&D Lab

Innovation and Research in **new gummy technologies** to capture the hearts and mouths of discerning supplement consumers

Product prototyping & Feasibility Evaluation at our Pilot Plant

Quality Assurance Tests by members of our Sensory Panel

Process & **Packaging Engineering** at Packaging Lab

Innovation Sessions, Brainstorming workshops & Product Branding along with our Marketing, Sales and R&D Teams

Regulatory affairs support during every step of the product development process

Customized packaging
to bring your brand to life.

Bottles,

Doypacks,

Sachets

Standing Pouches!

As a leading developer and manufacturer of innovative gummy technologies, **we have been working for years on extensive research and development in new gummy technology** platforms that can solve any type of formulation challenges while bringing exciting products to consumers.
